

Brainstorming & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Step-1: Team Gathering, Collaboration & Problem Selection

The team gathered to collaboratively discuss and analyze different ideas related to disaster management, focusing on improving flood prediction and early warning systems using a machine learning approach.

Project:
A COMPREHENSIVE MEASURE OF WELL-BEING (HDI Prediction using AI)

An AI-powered system that predicts the Human Development Index (HDI) category of a country using key indicators like life expectancy, education and income.

- 10 minutes to prepare
- 1 hour to collaborate
- 5 team members

1 Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

- Team gathering**
Define who should participate in the session and send calendar invites. Share relevant information or pre-work as needed.
- Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.
- Learn how to use the facilitation tools**
Use the facilitation superpowers to run a happy and productive session.

2 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

PROBLEM STATEMENT

How might we accurately predict HDI categories and provide insights to help policymakers, researchers and communities improve human development?

3 Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step 2: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Group No.	Category
1	Ashishpaul Gunipe	Develop a Machine Learning model to predict HDI category	1	Machine Learning
2	Jessika Jasmin Vemagiri	Collect, clean, and preprocess the UNDP HDI dataset	1	Data Processing
3	Karra Murali Mohan Venkata Durga Anil	Design and develop a Flask-based web application	2	Web Development
4	Mandala Prasanna Satya Durga	Create data visualizations (graphs, heatmaps, correlation analysis)	2	Data Visualization

5	Veera Venkata Surya Sai Pithapurapu	Prepare project documentation, testing, and deployment support	3	Documentation & Testing
---	-------------------------------------	--	---	-------------------------

Brainstorming & Idea Prioritization Template

Step 3: Idea Prioritization

Each group of ideas was evaluated based on feasibility and importance. The team selected the most practical and effective solutions for developing an AI-powered Human Development Index (HDI) Prediction System.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Machine Learning Model for HDI Prediction	High	High	1	Yes
2	Data Collection, Preprocessing & Visualization	High	High	2	Yes
3	Flask Web Application for HDI Prediction	High	High	3	Yes
